1. Introduction

This document outlines the business requirements for the MotorPH payroll system. The main objective of this system is to streamline and automate payroll processing, ensuring accurate and timely payment of employees while maintaining compliance with relevant laws and regulations.

2. Business Objectives

The key objectives of implementing the MotorPH payroll system are as follows:

- **Efficiency:** Automate manual payroll processes to reduce administrative workload and minimize errors.
- **Accuracy:** Ensure precise and error-free salary calculations and tax deductions.
- **Compliance:** Meet all legal and regulatory requirements related to payroll management.
- **Security:** Implement robust security measures to safeguard sensitive payroll data.
- **Scalability:** Design a system to accommodate the company's growth and evolving payroll needs.
- **Employee Self-Service:** Allow employees to access and manage their payroll information securely.

3. Project Scope

The MotorPH payroll system is composed of the following key features and functionalities:

3.1. Employee Information Management

Maintain a centralized database of employee information, including personal details, salary structure, tax information, and relevant documents.

3.2. Time and Attendance Tracking

Integrate with a time and attendance system to capture accurate work hours for each employee.

3.3. Salary Calculation

Automate salary calculations based on work hours, overtime, bonuses, deductions, and taxes, compliant with local tax laws and regulations.

3.4. Employee Self-Service Portal

Provide a secure portal for employees to access their payroll information, such as payslips, tax forms, and annual statements.

3.5. Payroll Administrator Roles

Implement various user roles and permissions to control access and maintain data security.

4. Stakeholders

The main stakeholders involved in the MotorPH payroll system implementation are:

1. **HR Department:** To manage employee information, attendance records, and leave management.
2. **Finance Department:** To oversee payroll processing, tax calculations, and reporting.
3. **Employees:** To access their payroll information and manage personal details securely.
4. **IT Department:** To oversee system integration, maintenance, and data security.

5. Constraints

The development of the MotorPH payroll system considers the following constraints:

1. **Budget:** The project adheres to the allocated budget for development and implementation of ₱500,000
2. **Timeline:** The system is developed and deployed within the agreed-upon timeframe.

6. Assumptions

1. Employees input their time and attendance data accurately through manual entry or automated systems.
2. The company provides the necessary resources, including hardware, software, and infrastructure, to support the payroll system.

3. The IT department ensures data backup and implements disaster recovery measures.

7. Risks

1. **Data Security:** Unauthorized access to sensitive employee data and financial information.
2. **Integration Challenges:** Difficulties integrating the payroll system with existing HR and financial systems.
3. **Data Inaccuracies:** Errors in payroll calculations leading to incorrect salary disbursement.
4. **Regulatory Compliance:** Failure to comply with changing tax and labor regulations.

8. Reporting Requirements

The MotorPH payroll system generates the following reports:

1. **Monthly Payroll Summary Report:** An overview of monthly payroll expenses. See an example in the Data Repository - Sample Documents on our website.
2. **Payslips:** Detailed pay statements for individual employees. See an example in the Data Repository - Sample Documents on our website.

9. Approval

The relevant stakeholders have reviewed and approved this Business Requirements Document for the MotorPH payroll system.

Eduard Hernandez
IT Operations and Systems Officer

Andrea Mae Villanueva
Human Resource and Management

Roderick Alvaro
Accountant

Bianca Sofia Aquino
Chief Finance Officer

Antonio Lim
Chief Operating Officer

Manuel Garcia III
Chief Executive Officer

Note: This Business Requirements Specification Document is the foundation for the subsequent phases of the system development life cycle, including system design, development, testing, and implementation.
